With highly compatible enterprise-class servers at the foundation of your IT infrastructure strategy, you can integrate with your cloud of choice, deploy and move workloads where you want — on-prem or in the cloud. Welcome to the IBM Community Together, we can connect via forums, blogs, files and face-to-face networking. Find your community Lab Name / Code: Microcontroller and Embedded Systems Lab / 18CSL48 - IV SEMESTER (ISE) The importance of Microcontroller and Embedded Systems is well known in various engineering fields, such as Computer Science, Information Science, Electronics, and Electrical engineering. Programming can be done using Xilinx ISE . Download the programs on a FPGA/CPLD boards such as Spartan 6 and performance testing may be done using 32 channel pattern generator and logic analyzer apart from verification by simulation with tools such as Xilinx. 15/05/2019 - Virtual Desktop Infrastructure (VDI) is very complex. Many companies set out to build a Windows-based VDI or DaaS (Desktop-as-a-Service in the cloud) offering for their users but poor planning and execution can lead to hitting brick walls which ultimately lead to projects stalling out or outright failure, as in scrap it completely and do something else after much time ...
